

VIVITÉ[®] Skin Care Products

VIVITÉ[®] skin care formulations are based on exclusive *GLX Technology™*, a formula matrix that acts as a catalyst for the penetration of glycolic acid bound with natural antioxidants. No other skin care system can offer you this versatile component. VIVITÉ[®] skin care has *GLX Technology™* throughout the product line in unique formulations that maximize the anti-aging benefits.

The VIVITÉ[®] skin care routine provides many benefits. *GLX Technology™* has been shown to stimulate the skin's natural production of hyaluronic acid and collagen. *GLX Technology™* has also been shown to stimulate the production of epidermal growth factor, which is vital to healthy, new skin. The antioxidants protect epidermal cells against destructive free radicals.
